## About Me

Web developer specializing in React.js with a solid foundation in NodeJS, ExpressJs, MongoDB, and Firebase. Proficient in creating responsive and engaging user interfaces. Experienced in utilizing Git for version control and collaborative development. Seeking a web developer position to leverage web development skills and contribute to dynamic web projects.

## Technical Knowledge

ReactJS, Tailwind CSS, NodeJS, ExpressJS, MongoDB, Firebase, Redux, Context, Git, Socket.io, Multer, Javascript, HTML, CSS

## Experience

### SoftTunners

August, 2023 - Present

#### Frontend Developer Intern

- I built a task management application similar to Google Calendar that consists of calendar functionality using Day.js library. It included addition of tasks and a Drag and Drop feature to add them in the main calendar. It was done without the use of any other libraries.
- Developed a chat-app using Socket.io that had been built using React, Tailwind CSS and Material UI Library. The backend was built using Node.js, Express.js, MongoDB and Multer. It had functionality of real-time messaging with the use of Socket.io, creating polls, sharing files and images that were stored locally using Multer, deletion of files and messages by admins and adding, removing people to the groups.
- Built a resume maker that takes inputs and creates a stunning resume with different templates and can be downloaded easily. Also contributed to building a dashboard, notice wall, homepage, etc.

### H. V. Impex Pvt. Ltd.

May, 2023 - July, 2023

#### Frontend Intern

- Learnt to develop React-based web applications, focusing on creating interactive and user-friendly interfaces. I focused on learning in-depth about various React features and became proficient in the technology.
- Learned Git, to manage source code efficiently, ensuring a systematic and collaborative approach to software development within the IT department..

### TRAINITY

March, 2022 - May, 2022

#### Intern

- Collaborated on implementing UI/UX designs in few projects using HTML, CSS, and JavaScript.
- Optimized website performance through code refactoring and image compression.
- Collaborated with cross-functional teams to troubleshoot and fix minor bugs.

# Projects

## CALM SOUNDS - MUSIC APP

**FULL STACK - ReactJS & Firebase (For Authentication, Storage and Database)**

CALM SOUNDS is a responsive ReactJS web application similar to Spotify having two interface for mobile and computer separately. It includes functionalities like Music Player(from Firebase Storage), creating and editing personal playlist, linking playlists to the user account, Authentication & implementation dark and light mode,
